

Awards and accreditations

We are proud of our reputation for delivering high quality, affordable housing and excellent services. Winning 52 design awards in recent years is testament to the high quality standards that One Housing Group applies to all its developments.

The reason for this success is that we work with the local environment of each development to build homes that enhance, rather than detract from the landscape.

Our development work covers inner city areas, many of which are conservation areas with strict planning requirements; therefore attention to detail and quality of design are paramount.

We are delighted to have won the following awards:
